

## **Cranes 101 comes to a host plant to conduct instruction & testing.**

Schedules can be tailored, so that Under 21-Ton Precast Delivery Crane training is one day, while Knuckle Boom training is another day. This allows participants needing only one type of crane certification to attend that class. If they need both certifications, they will attend all 3 days, including one for written and practical testing. A minimum of 8 to 10 people needed to hold this class. If 10 to 15 participants enroll, the training and written exams can be conducted within the 3-day window; however, a 4th day would be needed to finish the practical exams. Pricing is as follows: \$1,495 per/person for both crane courses/written & practical tests, and \$1,195 per/person for one course/written & practical tests.

*To learn how you can host or attend a certification class being hosted in your area, contact John Alexander at 866-788-7600 or by email:*

*[john.alexander@cranes101.com](mailto:john.alexander@cranes101.com). Additional crane-type certification courses/tests can be added for additional days.*
